PROFESSIONAL SUMMARY

Motivated and detail-oriented Junior Data Analyst with hands-on experience in data collection, cleaning, visualization, and reporting. Proficient in Python, SQL, Excel, and modern BI tools, with a strong foundation in statistical analysis and dashboard development. Adept at translating raw data into actionable insights that drive business decisions. Seeking an internship or entry-level role to apply analytical skills in a dynamic, data-driven environment.

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R (basic), PHP
BI & Viz	Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Charts), Google Sheets
Databases	MySQL, PostgreSQL, SQLite
Data Tools	Jupyter Notebook, Google Colab, VS Code
Web & Dev	HTML/CSS, JavaScript, React.js, Git, GitHub
Other	WordPress, Figma, UI/UX Design, SEO, Performance Optimization

EXPERIENCE

WordPress Developer & Data Analyst (Freelance)

2024 – Present

Tech Creator — Islamabad, Pakistan

- Designed and deployed 5+ client websites on WordPress with WooCommerce & Elementor, collecting and analysing site traffic data via Google Analytics to boost user engagement by 30%.
- Built MySQL-backed data pipelines to track sales and inventory, producing weekly Excel/Power BI dashboards for stakeholders.
- Performed SEO keyword-gap analysis and A/B testing, improving organic search rankings for 3 clients.
- Automated repetitive data-entry workflows with Python scripts, saving ~5 hours per week.

Junior Web Developer (Part-time)

2023 – 2024

Self-Employed — Remote

- Developed responsive front-end interfaces using React.js and Tailwind CSS, integrating REST APIs and parsing JSON datasets for dynamic content rendering.
- Created custom PHP plugins to extract, clean, and display structured data from MySQL databases.
- Collaborated with clients to gather requirements, analyse user behaviour metrics, and iterate on UI/UX for improved conversion.

PROJECTS

Sales Dashboard — E-Commerce Analytics | Python · Pandas · Power BI · MySQL

- Ingested 50,000+ transaction records from MySQL, cleaned and transformed data using Pandas, and built an interactive Power BI dashboard tracking KPIs (revenue, churn, CLV).
- Implemented DAX measures for month-over-month growth, reducing manual reporting time by 60%.

3-Tier Application Monitoring — Kubernetes | [Kubernetes](#) · [Prometheus](#) · [Grafana](#) · [Helm](#)

- Deployed a 3-tier web app on a local Kind cluster and integrated Prometheus scraping with Grafana dashboards to visualise real-time CPU, memory, and request-rate metrics.
- Analysed collected time-series data to identify bottlenecks, improving average response time by 25%.

WordPress E-Commerce Analytics Integration | [WordPress](#) · [WooCommerce](#) · [Google Analytics](#) · [Excel](#)

- Configured GA4 event tracking on a WooCommerce store; exported data to Excel and built pivot-table reports revealing top-performing products and peak traffic windows.
- Delivered monthly insight decks to the client, directly informing restocking and ad-spend decisions.

EDUCATION

Bachelor of Science — Computer Science

2023 – Present

University of Swabi — Swabi, Pakistan

- Relevant coursework: Database Management Systems, Statistics & Probability, Data Structures, Machine Learning Fundamentals, Information Systems.
- Active member of the university Data Science & AI Society.

CERTIFICATIONS & TRAINING

- | | |
|--|----------------------------|
| • Google Data Analytics Certificate | Coursera / Google, 2024 |
| • Python for Data Science & AI | IBM / Coursera, 2024 |
| • WordPress & WooCommerce Mastery | Tech Creator Academy, 2023 |
| • SQL for Data Analysis | Mode Analytics, 2024 |
